NURJAHAN JHORNA

UX/UI Designer | Frontend Developer

201-486-1841 | njhorna07@gmail.com | Portfolio: nurjahanj.vercel.app/

EDUCATION

New Jersey Institute of Technology | 2021-2026

Bachelor of Science in Web & Information Systems

SKILLS

- **Frontend Development:** HTML, CSS, JavaScript, React, Next.js, Node.js, REST APIs
- **UX Research:** User Research, Literature Reviews, Information Synthesis, Competitive Analysis, Personas, Usability-Focused Design
- **UX Design:** Figma, Wireframing, Prototyping, User Flows, Information Architecture, Canva
- **AI & Data**: Prompt Engineering, AI Workflow Automation, LLM Applications, Data Analysis, Knowledge Discovery
- **Tools:** Git, GitHub, VS Code, WebStorm, Vercel

WORK EXPERIENCE

NJIT - Newark, NJ | May 2025 - April 2026

Research Assistant

- Collaborated on interdisciplinary research applying artificial intelligence to sustainability challenges.
- Conducted literature reviews and synthesized findings from academic publications to support research initiatives.
- Designed and developed interactive web-based prototypes to communicate research outcomes.
- Built back-end services and data collection pipelines for processing and visualizing research metrics.
- Worked with researchers and stakeholders to translate technical requirements into user-centered

PROJECTS

GreenerAI | Full-Stack Developer & UX Researcher

React, Vite, Tailwind CSS, Express.js, Node.js, OpenAI GPT-4o API, Convex

- Collaborated with two student researchers to develop four functional React applications testing different UI-based interventions designed to encourage more sustainable AI usage.
- Built interactive sustainability nudges, including delay-based prompts, environmental impact notifications, and visual resource-use tracking.
- Implemented Express.js API integration, real-time data collection with Convex, anonymous usage tracking, and an A/B/C/D testing framework to support behavioral research.
- Deployed four applications on Vercel and developed a researcher-facing dashboard with CSV data export capabilities.

StitchPal | UX/UI Designer & Flutter Developer

Flutter, Material Design 3, OpenAI API

- Independently designed and developed an AI-powered crochet application that consolidates pattern generation, project tracking, and crafting tools.
- Established a cohesive visual system using typography, color, reusable components, and simplified mobile navigation.
- Integrated AI-generated patterns, personalized yarn suggestions, and project management features into a unified workflow.

Inflation & Housing Dashboard | UX Designer & Frontend Developer

React, Material-UI, Plotly.js, D3.js

- Designed and developed an interactive dashboard visualizing inflation and housing market trends across U.S. states.
- Created interactive charts, state comparisons, and filtering capabilities to make complex economic data easier to explore.
- Integrated multiple datasets and implemented responsive interfaces with dynamic visualizations.
